ABOUT US

ADOMNE was founded in October 2009 as a small family consulting company in Novi Sad called Adomne designing and consulting. Due to continuous development and growth of business, the company had been reorganized and changed its legal form at the end of November 2014.

Nowadays, denominated ADOMNE Ltd. designing and engineering Novi Sad, the company continues to provide services such as the planning and design of human environment in the fields of transportation, traffic, architecture, landscape and urban planning, with the development of various studies, researches, supervision, technical control and related consulting.

MISSION

Our task is professional and responsible work in order to create an efficient, functional, safe, healthy and accessible environment, using modern and innovative methods and software which improve the quality of life for people.

VISION

Our goal is to be recognized as a respected and competent company, one of the leaders in the region, providing high-quality and integrated services of planning, designing and consulting in the areas of urban planning, landscape, traffic and architecture with a high degree of social responsibility.

ADOMNE TEAM

Adomne Ltd. Novi Sad team consists of engineers from different professions, among which are planners, urban planners and designers with the license no. 100, 201, 300, 315, 370, 411, 412, 450 and 470 issued by the Serbian Chamber of Engineers, with years of experience in the planning and designing environments, including field work.

We are specialized in making all kinds of projects, traffic and traffic signalization, for which we possess a valid state permit (“high license”) P131S1 for the preparation and development of technical documentation for the building sites for which a permit issued by the Ministry in charge for construction, traffic and infrastructure of the Republic of Serbia is needed.

We were holders or participants in a large number of projects and professional events at home and abroad, among which those in Bosnia and Herzegovina, Montenegro, Macedonia, Hungary, Greece, Germany, the Netherlands, Spain, Portugal, Finland, Luxembourg and the Congo.

Members of our team are also members of a large number of local and international organizations, such as:

- Union of Engineers and Technicians of Serbia;
- Serbian Chamber of Engineers;
- European Concept for Accessibility -EuCAN, Luxembourg;
- Foundation Design for All, Barcelona, Spain.

As members of the national establishments, we participated in the work of a large number of professional teams and groups:

- Institute for Standardization of Serbia - Commission for the standards in the field of traffic signalization on roads and temporary road equipment;
- Ministry of Construction, traffic and infrastructure of the Republic of Serbia and the Serbian Chamber of Engineers – working on preparation of:
- Regulation of traffic signalization, regulation about the method of regulating traffic in the zone of works and regulation of technical standards of accessibility.
